Subject: Rockwool

Hi!

Have you been able to talk to WV about this?

Improper Permitting Process alleged for Rockwool Facility in West Virginia

In a July 28, 2020 letter to the West Virginia Department of Environmental Protection (WVDEP), the Jefferson County Foundation alleged that WVDEP improperly processed a permit modification for the Rockwool Facility (formerly, Roxul), mineral wool facility located in Ranson, WV. The permit change removed the option of Rockwool from burning coal in its Melting Furnace. Jefferson County Foundation seeks a new public notice period, including additional materials from the facility, which could result in a new analysis for Best Available Control Technology (BACT) requirements. Rockwool was permitted in 2018 as a new major stationary source and BACT was applied. At the time of the 2018 permit issuance, there was significant public interest and EPA determined that WVDEP had appropriately issued that permit. Region 3 will follow up with WVDEP regarding this most letter. **Contact:** Cynthia Stahl, 215-814-2180.
